

1 Enumerate a python list and try to print the counter with the list value¶

In [1]:

```
a=['apple','ball','car','dog']
```

In [6]:

```
b=(enumerate(a))
```

In [7]:

```
print(list(b))
```

```
[(0, 'apple'), (1, 'ball'), (2, 'car'), (3, 'dog')]
```

2 Enumerate a python tuple and try to print the counter with the tuple value

In [8]:

```
x=('apple','ball','car','dog')
```

In [10]:

```
y=(enumerate(x))
```

In [11]:

```
print(tuple(y))
```

```
((0, 'apple'), (1, 'ball'), (2, 'car'), (3, 'dog'))
```
